

SABOTEURS' CASE IN SUPREME COURT

RAF Blasts Hamburg Second Time In 3 Nights

ARMY BOARD'S POWER TO ACT IS CHALLENGED

Chief Justice Stone Calls Members To Hear Pleas of Defense Attorneys.

WASHINGTON, July 29 — Counsel for seven of the eight alleged Nazi saboteurs being tried by a military commission today told the supreme court today that President Roosevelt's proclamation denying them access to the civil courts was "totally invalid and unconstitutional."

This challenge of the war time powers of the Chief Executive and commander-in-chief was made in a brief in support of a petition for a writ of habeas corpus.

In effect, the defendants' army officer counsel asked the court to take the prisoners out of the hands of the commission appointed by Mr. Roosevelt and let them be tried in the civil courts.

The request was made at an extraordinary session of the nation's highest tribunal convened on call of Chief Justice Stone. The steadily supreme court chamber was filled by persons eager to have a spectator's part in the unusual event.

Prosecution's Reply

The defense attack brought a reply from prosecution counsel headed by Attorney General Biddle today.

"Military trial for the petitioners endangers no traditional civil liberty. These German soldiers have already been given rights which no American would receive in Germany, and now ask for 'constitutional' privileges which we do not allow our own soldiers."

The two United States army colonels defending the prisoners, Cassius M. Dowell and Kenneth C. Royall, told the court:

"May we respectfully suggest that the instant case presents a real test of our democratic form of government and its judicial system. It is this but still true to say that the soundness of any system of government proves itself in the hard cases where there is an element of public clamor. Such circumstances test the real ability of a government and its judicial system to protect the rights of an unpopular minority."

One Appeal Denied

The defense disclosed that Justice James W. McRea, of the United States district court for the District of Columbia, denied yesterday an application of the petitioners for permission to present petitions for writs of habeas corpus.

The defense freely conceded that all of the eight accused attended a school near Berlin and received instructions and directions for sabotage and manufacturing and transportation facilities, but declared that all the petitioners had testified that they did not intend to commit sabotage.

Summary of Facts

The brief made the summary of "certain salient facts relative to their conduct" prior to arrest. "The petitioners attended a school near Berlin and received instructions and directions as to industrial sabotage of manufacturing and transportation facilities. They were directed to commit no sabotage within 90 days after their arrival in America. They received no instructions or directions relative to obtaining information of a military nature or

MARION STORE BURGLARIZED

Large Quantity of Merchandise Taken from Kresge Co. Store Room.

An undetermined amount of merchandise including large quantities of Christmas toys was taken sometime since Saturday afternoon from storage rooms of the S. S. Kresge 25 cents store above 130 West Center street, J. S. Bobler, store manager, reported to police yesterday.

Items taken from the rooms included a large quantity of men's felt hats, duffel bags, flannel shirts, pajamas, and the balance in Christmas toys. Some of the merchandise cannot be replaced, Mr. Bobler said.

Discovered by Employee
The break-in wasn't discovered until about noon yesterday when an employee of the store went to the rooms to get some material. Nearly every case in the storage rooms had been forced open, police said. Much of the merchandise was strewn throughout the second floor of the building.

Capt. E. C. Mackan and Patrolman Lew Shadaker of the police department investigated the break-in. They said entrance to the building was gained by climbing a fire escape at the rear of the building and then entering an unlocked door on the third floor.

Desk Sergeant L. E. Reardon conducted a thorough search for fingerprints but found only a few smudges.

Checking Clues
Chief of Police William E. Marks said today that Capt. Mackan had been placed on the case. Several clues were being checked today, Capt. Mackan said.

The storage rooms are on the second floor of a building formerly occupied by the Brooks clothing store. The clothing store moved from the building several months ago when the S. S. Kresge Co. announced intentions to construct a new building block on West Center street.

The construction program was started as a means of combining Marion's two Kresge stores in one general unit.

Mr. Bobler said today that the construction program would be carried out after the war ended.

4 More Deeds Filed for War Plant Land

Four more deeds for land in the Seato Ordnance Plant area were filed yesterday and this morning in the Marion county recorder's office as the land acquisition office here began payments for the acreage in the site.

Deeds filed yesterday afternoon are as follows:
Mrs. Charlotte E. Foos and John C. Seckel of Marion, 80 acres in Scott township, \$7,255;
Mrs. and Mrs. Charles S. Philbrook and Mrs. Emma Lauer of Marion, 68.78 acres in Grand Prairie township, \$8,102.

The following filed deeds this morning:
Ray E. Harvey and his wife Adith of Cardington township, Morrow county, 80 acres in Marion township, \$3,144; Floyd F. Cluff and his wife, Kathryn F. Cluff, of Richland township, 27.97 acres in Marion township, \$7,690.

The first deed was filed shortly before noon yesterday.

MARION SOLDIERS LEAVE FOR CAMP

Board 2 Group Departs; Others To Go Later in Week.

Nine complaints were filed yesterday and Monday with Capt. Haberman, clerk to the Marion county rent control board. A tenth was filed but later was withdrawn.

All complaints received today and through next Tuesday will be given a hearing on Monday night, Aug. 10, at 7:30 in the common pleas courtroom.

Those complaints filed up to and including yesterday will be heard next Monday night. Landlords or tenants who have rent complaints to be heard by the board should file the facts of the cases with Mr. Haberman in the common pleas courtroom on the third floor of the courthouse.

The first of three groups of men from the city and county recently inducted into army service left Marion this afternoon enroute to a training center. All were from Board 2. Thursday men from Board 1 will enter for camp and on Saturday a group from Board 3 will leave.

In keeping with plans made more than a month ago, Marion Camp No. 32, United Spanish War Veterans, will sponsor a send-off for the men leaving from Board 1 Thursday afternoon. The Hardin High school band will present a program of music and the men will receive a treat from the Veterans' canteen provided with a contribution from the Spanish War Veterans.

Those left on today included Maurice J. Miloy of Bellefontaine, Don D. Ruten of 204 Elm street, Claude M. Dutcher of the Elite apartments, John L. McCombs of 401 West Columbia street, Norman W. Halcomer of 236 Blaine avenue, Robert P. Miller of 250 Park boulevard, J. Nelson Rulzer of 484 South Prospect street, Charles G. Carlisle of 120 North State street, Ray W. Bieser of 129 East Center street, Frank L. Ferguson of White Oak road, John D. Griffith of 334 1/2 South Prospect street, Carl A. Peterman of 135 East George street, Richard T. Marshall of 131 South State street, Santo A. Perito of 292 Belmont street, Cecil W. Davis of 220 St. James street, Johnson Myers of 689 Girard avenue, George W. Smith, transfer from Hartsville.

U. S. CONVOYS ELUDING SUBS

Caribbean Becomes Safer for Ships Under Watchful Eye of Warships.

By E. V. W. JONES
A. P. Correspondent

ABOARD A U. S. WARSHIP IN THE CARIBBEAN SEA ON A RECENT DATE—Great convoys of merchant ships are plowing with relative safety through these once dangerous waters.

United States navy men are successfully matching with wit and out-maneuvering undersea marauders that littered the sea with sunken ships in days before convoying began.

This reporter and an Associated Press photographer, Earl Shugars, are aboard a swift, hard-hitting warship which escorted the first Caribbean convoy to its destination and is returning with another to a United States port.

Lieut. Comdr. John F. Walsh, former instructor of ordnance at the naval academy and a veteran of foreign service, directed the first convoy as commanding officer of this warship. So successfully has he outwitted and out-maneuvered submarines that not one torpedo has been fired at our

(Turn to CONVOY, Page 9)

CRESTLINE WOMAN KILLED BY TRAIN

Special to The Star
CRESTLINE, July 29 — Mrs. Catherine Sabo, 55, met instant death when she was hit by a northbound passenger train on the Big Four tracks near Crestline yesterday afternoon.

She was returning from a bakery to her home on Washington avenue. Witnesses said she was directly into the path of the train, apparently not realizing the closeness with which it was approaching.

Mrs. Sabo was born Aug. 20, 1886 in Yugoslavia. She came to this country 22 years ago, settling in Crestline. Surviving are her husband, Andrew Sabo, three daughters, Mary and Catherine at home and Mrs. Anna Plumbo of Chicago and two sisters in Yugoslavia.

Funeral services will be held at 2:30 p. m. tomorrow at the Robert F. Beck funeral home with Rev. Charles Lange of Trinity Lutheran church in charge. Burial will be in Greenlawn cemetery.

Trimming of Historic Sycamores Starts on Courthouse Esplanade

Trimming of the sycamore trees on the courthouse esplanade, probably the oldest living reminders of the early days of Marion's history, started yesterday afternoon.

The tree-trimming, expected to eliminate the much-discussed problem of birds roosting in the heavy foliage, is the first step of Marion county commissioners in following up an announcement last Thursday that they were starting to act on recommendations submitted in May by the Marion Academy of Medicine.

MARION PLANT TO EXPAND FOR DEFENSE WORK

\$250,000 Enlargement Plans Made for Commercial Steel Castings Co.

A \$250,000 industrial plant expansion program for the Commercial Steel Castings Co. was announced today by Osgood Co. officials when issuance of building permits for the factory addition made public the plans for the project.

The Osgood company will build an addition to its steel foundry, which is operated under the name of the Commercial Steel Castings Co., to expand the company's production of war materials. For several months the Osgood Co., along with many other Marion industries, has been devoting virtually all of its production capacity to war materials.

The foundry addition will be about 120 feet square and will be constructed on the south end of the existing foundry. It will be of steel frame and steel sheet construction.

Other Facilities
The construction project also involves additional storage room, a pattern room and an office. In taking out building permits, the company broke the project into five separate buildings, although all will be connected. The five different permits were issued to cover the different types of construction embodied in the project.

The \$250,000 program not only provides for construction work but also for considerable equipment both in the addition and in the present foundry.

It is expected that the project will not greatly increase employment in the foundry because the equipment will be larger and of new style.

To Start Aug. 5
The general contract for construction work has been let to Henry A. Justus of Columbus. The contractor is to begin work Aug. 5, and completion is scheduled for Nov. 15.

Following is the list of buildings covered by permits issued today at the city clerk's office. The group includes four industrial buildings and an administration building. The cost estimates are on the buildings only and do not include equipment.

A 120 by 120 foot foundry addition estimated to cost \$30,000. This structure will be connected with the present 750 foot main industrial building. It will be 40 feet high at the peak of the steel roof and about 12 feet high at the eaves. It will be constructed of steel.

A 50 by 30 foot pattern shop to be of steel and concrete block construction and estimated to cost \$12,000.

A 50 by 218 foot pattern storage building estimated to cost approximately \$9,000. It will be of steel and concrete block construction.

A 20 by 100 foot foundry addition estimated to cost \$3,000. It will be of steel and frame construction.

A 72 by 28 foot frame office building estimated to cost \$6,000.

TO DISCUSS SUCCESSOR

By The Associated Press
COLUMBUS, O., July 29—Republican state central and executive committees will discuss next Monday the supreme court vacancy created by the death of Gilbert Bettman of Cincinnati. State Chairman Ed D. Senor did not announce in calling the meeting whether he would ask committee members to endorse a candidate for the post. Gov. Bricker has indicated he would not appoint a successor before the Aug. 11 primary.

RED DEFENSE IS STIFFENING

Greater Resistance Develops in Spite of Reinforced German Drive.

By The Associated Press
MOSCOW, July 29—The Russian defense of the Caucasus showed signs of stiffening today as the steadily reinforced German drive across the lower Don shaped into spearheads toward Kishinev, Sukh and the Tikhoretsk-Stalingrad railroad linking the oil fields to central Russia.

A communiqué said the Red army was "displaying stubborn resistance" after being forced back in the Bataisk area, 15 miles south of Rostov along the main railway to the oil port of Baku. Kishinev is a station on this line 45 miles south of Rostov.

The Germans also were meeting stiff resistance against a secondary thrust developing down a spur linking the junction with the Tikhoretsk-Stalingrad railway at Sukh, 100 miles southeast of Rostov.

Further up the Don, midway between Rostov and Stalingrad, the Germans bottled fiercely under shell fire and bombing in an attempt to enlarge at least three bridgeheads on the south bank of the river in the Tavrisyank area, where the Don flows within 35 miles of Stalingrad.

The defense freely conceded that all of the eight accused attended a school near Berlin and received instructions and directions for sabotage and manufacturing and transportation facilities, but declared that all the petitioners had testified that they did not intend to commit sabotage.

Summary of Facts
The brief made the summary of "certain salient facts relative to their conduct" prior to arrest. "The petitioners attended a school near Berlin and received instructions and directions as to industrial sabotage of manufacturing and transportation facilities. MAYOR ASKS SUPPORT FOR SALVAGE DRIVE

Lists Scrap Materials Needed in U. S. War Effort.

Using every man, woman and child in Marion to hasten the day of victory by salvaging needed scrap materials, Mayor Russell C. Shure today pledged full support to the local salvage campaign.

By turning over to the salvage committee of Marion every available pound of old materials, we all can make a direct and helpful contribution to our national victory effort.

Every 50 pounds of steel means another 100 mm. shell; a discarded door knob will help make a dozen cartridges; every ton of steel will make another tank.

Call upon every resident to search his home carefully for scrap metal to attic, looking for scrap iron and steel, copper, brass, zinc, aluminum, rubber, rope, burlap. Every one of these materials is needed today by American industry for manufacture into weapons and equipment for our armed forces.

There are many tons of valuable scrap in Marion. We must collect every ounce of it and see that it goes into America's war plants. Our steel mills, tank factories, shipyards, airplane plants and other war industries are already exceeding their former production records. We can help them attain even higher production by sending them all the scrap materials we can find.

As you search for scrap in your own home, remember that the scrap you are looking for will give our armed forces more weapons to win a quicker victory.

Marion's goal is 500 tons of scrap metal. Containers have been placed at the city parking lot and at filling stations for the contribution of scrap metal. In addition to scrap iron and steel the materials to be collected include brass and other nonferrous metals, rubber, rope and fat.

Death Penalty for Spies Voted by Huge Majority of Public in U.S. Survey

By GEORGE GALLUP
Director, American Institute of Public Opinion

PRINCETON, N. J., July 29—The American public is taking a ruthless, hard-boiled attitude toward the question of punishing spies.

It wants the punishment to be death. For every citizen who thinks imprisonment is harsh enough for spies, there are more than 10 who recommend the firing squad or the gallows.

The public's attitude is shown in the results of a nationwide Institute survey conducted shortly after the opening of the trial of the eight Nazi saboteurs, who landed from submarines on the east coast.

The survey did not deal with any specific case, but only with the general question of how to punish the convicted spies.

The nation wide staff of interviewers who conducted the poll report tremendous public interest in the whole question of treating spies—more interest, in fact, than in such subjects as inflation, the rubber shortage or this year's congressional campaign.

The survey asked voters the open question: "What punishment should be given to spies caught in this country?"

There is not much question about the prevailing attitude, as the following table shows.

Death penalty	85%
Imprisonment	12
Deportation	2
Miscellaneous	1
No opinion	3

The 85 per cent in favor of the death penalty includes 28 per cent who recommended the firing squad.

As an experiment in question-asking, the Institute conducted a second survey among a national cross-section containing comparable types but different individuals from those questioned in the first survey.

This second study asked the specific question "Should spies caught in this country be punished by death?"

It is interesting to note that the results on this question were almost exactly the same as on the other. Eighty-four per cent voted in favor of the death penalty, as compared to 85 per cent when the open question was used.

Convictions of treason have been rare in American history. Up until the conviction a few weeks ago of Max Stephan, Detroit tavern-keeper, for aiding a Nazi war prisoner escaped from Canada, there had been no convictions of treason under federal statutes since the Whiskey Rebellion trial of 1793.

Marion Man Back from State Convention

William Kehlwecker, commander of Marion Chapter No. 22, Disabled Veterans of the World War, has returned from St. Louisville where he attended the twenty-first annual convention of the organization.

Attending also were Roy Payne, state commander, and Mrs. Payne of Crestline. Named to serve another year.

Nostalgia Not Fatal Soldier's Mother Told

WASHINGTON, July 29—Representative Greg Holbrook, Democrat of Ohio has eased the mind of an anxious Ohio mother, who knows now that nostalgia isn't as bad as it sounds.

The mother wrote her congressman after her soldier son was released from the army and sent home to recuperate from acute nostalgia.

Her letter, urging Holbrook to take up the matter with the war department, said the son always had been a picture of health and had no serious ailment before he was inducted into the army.

The army doctor used the correct term "nostalgia" to say that the selected was plain homesick. Holbrook explained.

Union County Blacksmith Resets Tires on Buggy

MARYSVILLE, July 29—Walter Stump, a local blacksmith with many years of service saw the years turn back Tuesday when he was called upon to reset the tires on a buggy.

The job was performed for Charles Laughorn of near here who is getting prepared for the expected tire shortage. Although he lives on a farm and is eligible for retraining if they are available, Mr. Laughorn wished to save rubber through the use of a horse and buggy.

The Big Water Sprinkling Season is Still Ahead!

Social Affairs

PICNIC last evening at McKinley park was a social date on the calendar of Gamma Mu chapter, Delta Theta Tau sorority. A short business session was held. Guests included the following members at large: Mrs. George Wolgamot of LaRue, Mrs. Kenneth Tobin, Mrs. Leonard Bechtel and Mrs. Robert Middleton. Plans for the outing were in charge of a committee composed of Mrs. Glen Perry, Miss Alice Gertrude Smith, Mrs. Robert Heininger and Miss Martha Van Atta.

Birthday Party Held at Home Near Meeker

Mr. and Mrs. Emerson Owen of near Meeker entertained recently at their home in honor of the birthday anniversary of Z. J. Owen of near Marion, Ben Elal of Pomona, Calif., and Miss Della Owen of LaRue. A basket dinner was served and pictures of the group were taken. Mr. Elal is visiting here for the first time since going west 38 years ago. He was born and spent his early life in LaRue. He is visiting his brother-in-law, Z. J. Owen and nieces and nephews. Mrs. Roy Gungwer of Nevada, Mrs. Belle Dilsaver of Edison, Emerson Owen of Meeker, Mrs. Ivan Owen of LaRue and Mrs. Harold James of Marion.

Present were John, Della and Mary Owen of LaRue, Mrs. Delwin Collins and daughter, Delores Ann of Newark, Mr. and Mrs. Roy Gungwer, Phyllis and Richard Adams and James Smiley of Nevada, Mr. and Mrs. George Dilsaver and daughters, Doris and Irene of Gallon, Mrs. Belle Dilsaver and sons, Carl and Ben of Edison, Mr. and Mrs. Clyde Coulter and children, Donald and Ruth of Martel, Z. J. Owen, Mr. and Mrs. Zell Owen of Marion, Ronald and Evelyn Owen and Mr. Elal of Pomona.

PARTY NEAR MARION

Mr. and Mrs. Harold Rengert of near Marion, entertained with a party Saturday honoring the eighth birthday anniversary of their daughter Joan. Those present were Mr. and Mrs. Wilbert Fetter, Mr. and Mrs. Elmer Rengert, Mr. and Mrs. Arthur Stiller, Misses Bernice and Virginia Stiller, Mr. and Mrs. Rengert, Janet, Rengert, Patty, Willy, Jerry Fetter and Dick Fetter.

YOU WOMEN WHO SUFFER HOT FLASHES
If you suffer "hot flashes," "dizziness," "irregularities," "are weak," "nervous," "due to the functional 'middle-age' period," in a woman's life—try Lyde's "Pinkettes" Vegetable Compound. It's helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions. Pinkettes Compound is worth trying!

Pattern 359 contains charts and directions for chair set; illustrations of it and stitches; materials required.

Send 11 cents for this pattern to The Marion Star, Needlecraft Dept., 22 Eighth Avenue, New York, N. Y. Write plainly pattern number, your name and address.

Couple Exchange Vows at Sycamore Church

Special to The Star

SYCAMORE—Sunday afternoon at 2:30 o'clock in the Sycamore Reformed church, Miss Kathryn Engler, only daughter of Mr. and Mrs. Herman Engler, of Sycamore, became the bride of Max Bonn, son of Mr. and Mrs. Luther Bonn, also of Sycamore. The single ring ceremony was read by Rev. C. F. Brouse. The bride was given in marriage by her father.

Miss Carolyn Camp of Toledo was the bridesmaid and Michael Swinehart of Columbus acted as best man. The ushers were William Niebel of Akron and Meredith Reidenman of Genoa.

Mrs. Vaughan Stuckey presented a recital of organ music before and during the ceremony and also played the wedding march. Miss Stuckey, accompanied by Miss Frances Menard, sang "If Love You Truly" and "The Sweetest Story Ever Told."

A reception was held at the Engler home immediately following the ceremony. Nearly 100 guests were present.

The bride is a graduate of Sycamore school and of a Toledo business school. She is employed by the Packard Auto Corporation in Toledo.

Mr. Bonn also is a graduate of Sycamore high school and is serving in the United States navy where he has been for nearly six years. He was in the battle of the Coral Sea. He returns to active duty next week.

The Gaze class of the Reformed Sunday school met Thursday with Mrs. Mildred Stever. She was assisted by Mrs. George Freese, Mrs. Ralph Bacon, Mrs. Marie Kines and Mrs. Clair Gorfman. Mrs. Dean Roby led devotions assisted by Mrs. Fred Grummel. Mrs. Naomi Norris read a poem and Mrs. Byrnie Weininger conducted a choir.

A son was recently born to Rev. and Mrs. B. O. Van Seve of Cambridge, Ohio. The parents formerly lived in Sycamore where Rev. Van Seve was the pastor of the Methodist church.

CALEDONIA PASTOR AIR FORCE CAPTAIN

Rev. Gleason Preaches Last Sermon at Union Service.

Special to The Star

CALEDONIA—Union services of the three Caledonia churches were held Sunday night at the Church of Christ. Rev. E. Sturtevant was in charge of meeting and gave the invocation. Mrs. Sturtevant led the singing. Rev. Stanley C. Stahl of the Norfolk Universalist church read the scripture lesson and led in prayer. Rev. R. H. Gleason took for his text "Love Thy God." Rev. Stahl pronounced the benediction.

After the services the members of the Universalist church and a few friends went to that church where a farewell meeting for Rev. Gleason, who was in uniform and preached his last sermon was held.

At the business meeting of the church board his resignation was accepted and Rev. Stahl was employed in his stead. Refreshments were served during a social hour.

Rev. Gleason was presented a sum of money from the church. His rank is captain and he will be with the army air force. He has been assigned to Air Force Technical Training Command at Greensboro, N. C. Capt. Gleason is married and has two children, David 17 and Nancy 8, who with Mrs. Gleason will live at Woodstock, O. for the present.

Mr. and Mrs. N. D. Hill, daughter Marianne and John Usha have returned from a two weeks' vacation in Michigan.

Mrs. Catherine Dice returned home Saturday from a two weeks' visit in San Diego, Calif., with the family of her son, Warrant Officer Paul Dice.

Corporal John H. Mills who has been at Camp Grant, Ill., is at the home of his parents, Mr. and Mrs. O. M. Mills. With his wife he will leave Friday for Carlisle Barracks, Pa.

Marion Canteen Gets Thanks of Grateful Mother

A mother's sincere appreciation for the graciousness shown her son at the Union station canteen was received this week by Mrs. Pete Cutarelli of 364 Pearl street whose niece, Mrs. Robert Manhart, is a neighbor of the mother in Columbus, Mo.

The letter, addressed "To the Canteen Workers at Marion, O.," said:

"My son, a naval air corps student, went through Marion, Ohio about 10 days ago and stopped at your canteen. He pronounced it the nicest place of its kind which he has found.

"He mentioned the pleasant manner and smile of the ladies who served the food, and I feel that this was appreciated as much as the food was welcome.

"I thank you for the work you are doing."

The letter was signed by Mrs. E. C. Loren, 4 Sunset Lane, in Columbus.

Ashley Couple, Formerly of Marion, Wed 50 Years

Mr. and Mrs. Charles Riemar, formerly of Marion, now residents of Ashley, celebrated their fiftieth wedding anniversary July 23 with a family dinner Sunday at the home of their daughter and son-in-law, Mr. and Mrs. Franklin Greenfield, in Ashley.

They are parents of four sons and one daughter, with whom they make their home. They also have five grandchildren and one great-grandchild.

State yield of revenue from motor-fuel taxation totaled \$15 million dollars in 1941, 25 per cent of all state tax collections, according to the Department of Commerce.

WEDDING DRESS

Family Reunions

Miss Wilma Wilson and Soldier Take Vows in Alabama

MR. AND MRS. W. S. WILSON of Brush Ridge are announcing the marriage of their daughter, Wilma, to Lieut. James A. Wiley, son of Mr. and Mrs. P. J. Wiley of Byesville, which took place July 25 at Anniston, Ala. The double ring ceremony was read by Dr. Melton Clark, pastor in First Presbyterian church.

For her wedding Miss Wilson chose a yellow shantung dress with which she wore brown and white accessories and a shoulder corsage of gardenias.

The bride has been attending Ohio university. Lieut. Wiley, who was graduated from Ohio university May 31, this year, was a member of the Pershing Rifles, military honorary, and Phi Beta Kappa fraternity. He was commissioned a second lieutenant and is stationed at Fort McClellan, Ala. The couple will make their home at Wetherly Hall, Jacksonville, Ala.

East Oxford Homecoming Held Near Kilbourne

ASHLEY—The annual East Oxford homecoming was held Sunday at the home of Mr. and Mrs. Marion Hatten near Kilbourne. A program included readings, songs and talks by Rev. D. E. LaFollette and Rev. John Pfahler. Officers chosen are: president, Mrs. Josephine Maloney; vice, president, Harold Shoemaker; secretary, Mrs. Eva Martin. The group will meet next year with Mr. and Mrs. George Dunlap on the Horseshoe road.

The marriage of Miss Shirley Hickson, daughter of Mr. and Mrs. Ray Hickson of Columbus, and Ravid Rupert, son of Mr. and Mrs. Elton Rupert of Ashley, was solemnized Thursday, July 23, at the home of the bride's parents. Rev. J. O. Kilmer read the double ring ceremony. The bride graduated from the Ashley High school with the class of 1940 and the bridegroom from the same school in 1938. Mr. Rupert has entered the service and will leave for duty Aug. 4.

Saturday at the Kilbourne Methodist church, Miss Betty Jane Hahn, daughter of Mr. and Mrs. William Hahn, and James Floyd Pfahler, son of Mr. and Mrs. Lloyd Pfahler, all of Mansfield, were united in marriage. Rev. John Pfahler read the single ring ceremony.

Shower in Honor of Beech Couple
Special to The Star

BEECH—A miscellaneous shower was held for Mr. and Mrs. Elmer Showers (Betty Johnson) Saturday at the home of the bridegroom's parents, Mr. and Mrs. J. C. Showers, here.

Mrs. Callie Beckel and daughter, Mrs. D. B. Gompf, Mrs. Orris Myers, Hazel McChesney, Mrs. Harold Fryer were guests at the Salem Ladies' Aid society meeting Thursday at the home of Mrs. J. F. Tittelbaugh.

A piano solo was given by Hazel McChesney. The devotions were led by Mrs. O. A. Myers.

GUESTS AT MT. GILEAD
Mr. and Mrs. Mel Miller and Mr. and Mrs. Floyd Cleland and children at near Marion were Sunday dinner guests of Mr. and Mrs. Grover Foos and Misses Clara and Lydia Foos of Mt. Gilead. Mrs. Grover Foos and son Virgil and Miss Clara Foos visited Monday at the home of Mr. and Mrs. Cleland. Mrs. Ada Landis and daughter of St. Paul, Minn., and Mrs. Foos and Miss Clara Foos visited Monday at the Miller home.

PARTY AT LARUE
Mr. and Mrs. Don Vurden of LaRue entertained with a family dinner Sunday for the pleasure of the latter's brother and wife. Mr. and Mrs. Lyle L. Phelps whose marriage took place last week, Favors were miniature boats and napkins, bearing the insignia of the navy signal corps. Mrs. Phelps before her marriage was Mrs. John Ann Walsh. Mr. Phelps is in the signal corps of the navy.

We're at It Again

IN ORDER to keep from getting panicky even a skeptic must hope that the government has a plan in mind for dealing with rubber. He doesn't know what the plan is, and there's circumstantial evidence that the government doesn't either, but surely there must be something somewhere that makes sense.

Meanwhile, if the government cares to send out scouts, it will find that it has given a shot-in-the-arm to hundreds of thousands of wishful thinkers who swore off for the duration immediately after last Dec. 7. If their government had told them at any time what to do, they would have done it. But their government proved to be a babel of voices giving conflicting advice, with an overtone of private voices purporting to be conveyors of inside information. Thus confused, the wishful thinkers decided in droves that as long as nobody knew anything about it anyway they might as well go ahead and not let the rubber situation shorten their lives or spoil their fun. Vaguely, they realized it was something like the prevailing mood before Pearl Harbor, when official confusion made it so easy to believe nothing was going to happen. Vaguely, they realized that hot air to the contrary notwithstanding, the shortage of rubber was as serious as they'd heard it was. But with no definite guidance from their government, which alone was in a position to know, they found it easier to hope something would turn up when it was time to suffer the consequences of wasting rubber. In fact, Micawberism is developing so rapidly that gasoline dealers in the east are frankly hopeful of getting rid of gasoline rationing in the near future.

Windbags for Tires

DON'T bet that the government will take positive steps to prevent the useless driving of all of us are doing—until after election. From now till then, the only substitutes offered for the tires that can't be obtained any more will be windbags, not all of them political windbags either.

Even shrinking violets trying to remain in ignorance are finding out that certain heavy-weight business interests want the synthetic rubber business so much they will go to any lengths to get it.

They don't want any decisions made that aren't in their favor. They are beating their drums in Washington. Then there are the politicians who are trying to postpone any and all decisions not in their favor. The result is the worst muddle since the incredible era when this country switched from the stage coach to the iron horse and the financiers and politicians staged a free-for-all for the privilege of building railroads.

To the public, only one thing about all this is really important. Cars are being laid up for lack of tires. Claims, counter-claims, threats and reassurances are no substitute for rubber. It's exactly like the situation that led up to Pearl Harbor and the rubber emergency in the first place—a lot of people talking their heads off to save their skins. The basic fact of the rubber situation hasn't been changed one whit since last Dec. 7. There isn't going to be any more unless the United States thinks and acts fast.

Congressional Poisoning Antidote

PROBABLY it never happened before. The joint congressional committee on reduction of non-essential federal expenditures recommended last Christmas that \$1,301,075,000 be saved in the budgets of 15 agencies during the next fiscal year. The same committee reports now that congress saved that much and \$12,908,208 more. Committee Chairman Byrd of Virginia says it's a fine performance, but hastens to point out that mounting war expenditures make further savings in "non-essential" expenditures necessary.

Part of the public complaint against congress has been its seeming reluctance to cut the suit to fit the cloth. Now that a large sum of money actually has been saved, it seems possible that some congressmen running for reelection may boast about it; it would be a novel experience to boast about not spending money, but so much is being spent on the war effort that there could be no complaint of parsimony. In the interests of finding an antidote for congressional poisoning, which is worrying many patriots, congress couldn't do better than to lop off another billion or so from non-essential government spending. To be sure, President Roosevelt has insisted that all government spending is essential and, therefore, cannot be reduced, but the facts indicate the contrary.

FINDING AN OPENING

The fellow who says ceiling will not halt the upward trend of prices must think they're going into the second story by way of the fire escape. —Indianapolis News.

Comparison of War Planes Difficult But U. S. Models Believed Doing All Right.

By PAUL MALLON

WASHINGTON, July 23.—Representative John W. Bricker, Ohio, today said that the U. S. military establishment was doing all right in its comparison of war planes.

His criticism came forth the same day it was announced that American flyers had used British planes in their last raid on the continent, instead of their own. Also at least one aviation manufacturer in this country has been complaining lately that our program puts too much emphasis on quantity, too little on quality.

The inference from all these and other similar murmurs, is that our fighting ships are inferior to both the Japs and the British.

Such drastic conclusions however do not seem warranted. If they were true, we certainly have the most colossal assembly of dunderhead, ever assembled in choosing planes for our fighting services.

They have known all about the Japs, as well as the British ships, for many months, and only the most extraordinary stupidity would possibly have prevented them from using the vast mechanical facilities and genius of American production.

Comparisons Difficult But the situation is hardly so clear cut. The Jap ships, for instance, seem to be superior in some qualities, the British in others, and ours in still more.

You cannot have maneuverability, fast climbing and speed in planes without neglecting armor, firepower and self-sealing gas tanks. The Japs, the British and our people have been required to choose which of these qualifications they wanted—and which they would sacrifice.

Now no cautious reporter will attempt to do anything more in the current argument about aviation technicians than report the full facts, without expressing arbitrary judgment. The other side of Mr. Johnson's story, as I gather it here, is this:

The Jap Zero is superior to our navy fighters in climbing ability and speed, but it is very vulnerable. An AP dispatch recently claimed new Jap models are sacrificing their speed to put on more armor. The Zero has no armor now, and does not carry self-sealing gas tanks. One hit and it is gone.

Pilot Efficiency In combat, so far, our planes have proved more than a match for the Japs, due perhaps in some part to our superiority in armor, firepower and self-sealing tanks, but most of all because our pilot efficiency is greatly superior to that of the Japs.

Our PBV flying boats (long-range patrol bombers), however, are superior to the Japs.

Our PBV flying boats (long-range patrol bombers), however, are superior to the Japs.

Ottawa Still Sparkles

Canadian City One of Few Capitals Not Yet Dimmed.

By DON WHITEHEAD

OTTAWA, Ont., July 23.—(Wide World)—War has not yet dimmed the night-time sparkle of Canada's "little Washington," one of the few capital cities of the world which has not seen the lights blacked out from the bomber or dimmed to help defeat the submarine.

Attack by air seems remote in this inland city. No one sees any immediate need of a dimout. So the lights glow and the flood-lamps glare when darkness comes—a strange contrast to the somberness of American coastal cities after nightfall.

Up on Parliament Hill, the huge gray stone buildings with their tall spires and towers reaching into the sky are sheathed in the beams of many spotlights. Downtown main streets are bright with lights and multi-colored advertising signs.

More Women Than Men Like Washington, Ottawa has a great many more women than men, most of them clerical workers in expanded government agencies or wartime organizations. Many women are in the uniforms of the Canadian women's army corps, and the women's division of the Royal Canadian Air Force.

You can almost pick out the men who have returned from overseas by the way they walk the streets looking at the lights even though Ottawa is not a large city.

The other night a young lieutenant who had just returned from overseas duty with the RCAF was taking in the sights. "You know," he said, "you forget how much the lights really

is one type of ship that has been no match for the Jap Zeros, but our flying fortresses are supreme. New navy planes will be coming along as soon as present orders are finished, and promise correction of some of our defects.

The army started off with planes similar to the light firepower and protection of the Zeros, as did the British, but these were soon abandoned.

Earlier models of our P-40 proved greatly inferior to both the British and Japs, but a British communiqué Sunday paid high tribute to the new P-51, our latest North American pursuit ship.

The old P-40s have been used mainly by our air force in China and Libya, but new models in use elsewhere carry superior firepower, armor, etc., although they are not as maneuverable as the Zeros.

New P-47

Our new P-47 high altitude interceptor is supposed to fight higher and harder than anything flying today. Republic is building this new army ship and deliveries are being made but not in quantity yet.

It has a 2,000 horsepower air-cooled engine, and has tested at 600 miles per hour in a power dive, flying level at 400 miles per hour. It will outshoot the Zero and has greater protection.

As for the Americans flying British ships in their first raid, it is said that British production has concentrated on pursuit ships which they cannot easily get from us, as these must be crated and shipped overseas, while our production has placed emphasis on big bombers which can be flown over. The British are supposed to fly our bombers in England, while we use their pursuits.

For these reasons, little official notice was taken of the Johnson charges or other critical murmurings. The men in authority seem to concede, by their explanations cited above, that all our ships are not the best in the world, that much remains to be done, although they, at least, seem to be satisfied that they are doing it.

Certain it is, that the isolated engagements in which we have been involved so far have proved that our fighting men have what it takes to win. Our leadership and our equipment still has not been so thoroughly tested as yet. Until they are tested, no outsider can safely reach conclusions as to their efficiency. At least evidence will be lacking upon which any drastic changes can be forced by public opinion.

Meanwhile, the Johnson charges will serve constructively to build fires under the powers that be and force them to the utmost of their ability.

TRAFFIC SITUATION IN INDIA

America's Billion Dollar Rubber Plum

Washington Scene of Struggle for Control of Industry Forced on U. S. by Pearl Harbor.

Part, perhaps most, of the confusion in handling the rubber problem can be traced to the amount of money involved in the synthetic rubber industry that is America's only solution until the war has been won. In this article, the science editor of Associated Press explains what is at stake.

WASHINGTON has a billion-dollar plum dangling before the eyes of big business, the new synthetic rubber industry. The juice in the plum is post-war control of this enormous new industry.

Synthetic rubber as a billion-dollar proposition goes double. First, the cost of the plant in the program now planned will be about one billion. Second, for 12 years the annual value, at the factories, of the American rubber business has been about one billion.

The rubber factories themselves won't cost the billion. A larger item is the expense of the new plants to produce the raw materials—the butadiene, alcohol, styrene and acrylonitriles, to name only big bulk stuff.

No nation ever tried to set up so huge a business in so short a time. That time is two years from Pearl Harbor. That is, capacity by the end of 1943 of 800,000 tons a year, which is about 200,000 tons more than America's peacetime rubber use.

From one point of view it is the richest prize ever dangled before industry. From another, the plum is likely to have worms in it before it is picked.

Most threatening "worm" is heaven, the natural rubber tree of the East Indies, a source now cut off but certain to come back to compete with synthetic at lower prices for natural rubber.

Another is the matter of international policy after the war. Whether we shall set long last stop relying on foreign sources for a vital need, or whether it will be considered better to do at least considerable traffic in rubber with friendly source nations.

But, "worms" or not, there is certain to be still enough plum left to merit the study of the shrewdest business planners.

FIRST come the advantages from the fact that government is paying most of the building bill. Contracts are written so that at the end of the war the government will be owner of the plants which make the synthetics for tires. That is the general plan, but there are no specific figures.

The fact behind this is no expense tag huge that no private industrialist or corporation can afford now to take the risks.

After the war some of the big concerns—petroleum, rubber or chemical—may find it profitable to take over the government plants, at a reduced price. Political support for this will be possible from a large number of voters whose jobs by then may depend on continuance of an American farm boom likely to contribute similar votes, because as the rubber program now stands, much of the raw material will be grain and other crops, perhaps like potatoes, which are easily converted into alcohol and thence into butadiene for synthetic rubber.

Sentiment also will help the growth of the rubber plum. Not only Thomas A. Edison, but many scientists and industrialists whose names never attracted attention, started a quarter of a century ago to make America independent in rubber—against exactly the emergency that has occurred.

There is another angle. What ever happens to the billion-dollar plum, a lot of smaller fruits are certain from the same plum tree. Those will be the synthetic rubbers that are better than natural rubber. Already at the time of Pearl Harbor the United States was producing more than 11,000 tons yearly of rubber synthetics

which could be sold because they did some jobs better than hevea tree sap.

Now science is making advances in all branches of synthetic rubber. Thiolok, the old sulphur synthetic rubber, has been altered within three months in a secret way to make at least usable tire retreads. Standard Oil of New Jersey has a new substance, reported within the last month, which will do a similar job.

The scientific discoveries—unpredictable—at best can be so good that the synthetic rubber plum will be worth far more than a billion dollars. At worst they assure a new rubber industry, which in any other period than war would be hailed as a major industrial achievement.

AMERICAN farmers may get in on two rubber plums. One is their cut of the synthetic raw materials. The other is domestic rubber crops to compete with the hevea tree.

Well known is guayule, southwestern desert rubber shrub, for development of which congress appropriated \$2,000,000.

Along in possibilities is cryptostegia, now enjoying a boom

around Brownsville, Texas, and nearby Matamoros, Mexico. Cryptostegia is better known in Florida and in many southern gardens as the Madagascar vine, with handsome, large, pink flowers.

This vine has rubber with less resin impurities than guayule. Its rubber content has been reported as a recent find. But in 1856 native-made rubber from this vine was displayed at the Exposition of Madras, India. It went then under the name of palay or pulay rubber.

U. S. Rubber Co. is experimenting with cryptostegia plants near Yuma, Ariz. This company also is looking into another plant, which in rubber quality comes closer to the hevea tree than possibly any other. This is a Jamaica vine, *Costertonia floribunda*, thick as a man's forearm. It will twine around a tree and can be tapped for rubber like the hevea tree. Possibly it can be grown below frost lines in this country. Lack of seed is a drawback to quick development.

Right up near the top along with guayule, cryptostegia and *Costertonia* is a southern United States tree named *sisia* durca. It has more resin than cryptostegia, possibly less than guayule, and can be grown to a rubber-producing stage in about three years.

Edison's goldenrod has considerable rubber, but national bureau of standards tests published by the U. S. department of agriculture give goldenrod rubber only half the tensile strength of hevea and 35 per cent of the abrasion resistance.

The department mentions two American southwest species of milkweed. They might yield 80 to 90 pounds of rubber per acre a year, probably too low to compete with the hevea tree which gives 200 to 300 pounds per acre and sometimes more than 1000 pounds.

California, Arizona, Nevada, New Mexico and Utah have large stands of rabbit brush containing good rubber. The department has planted in 30 states the Russian dandelion, *kok-sagzy*, whose roots contain rubber. The purpose is to find what it may do in the United States. An agricultural department bulletin says reliable reports from Russia do not verify current favorable reports about the dandelion rubber.

You can take it from the department's reports that there probably is no rubber in Osage oranges, despite popular belief, and that there is rubber in poinsettia, but not enough for commercial use.

World War a Year Ago

By The United Press
JULY 23, 1941
Germans announce Bessarabia "completely liberated from the enemy."

Finland severs diplomatic relations with Great Britain. French and Japanese sign protocol for joint "defense" of Indo-China.

"Beautiful" Food

By The Associated Press
LOUISVILLE, Ky.—American food is "beautiful," says 21-year-old Heaster Steele, who arrived recently from Surrey, England.

Miss Steele came here to marry Noel Merritt, tobacco company auditor, whom she met two years ago while he was serving as an air raid warden in Southampton. She was a member of the Women's Ambulance Defense Corps.

Miss Steele's first Atlantic crossing was made in a convoy of ships, one of which was torpedoed by an enemy submarine. She could not decide which was the more memorable experience—falling flat on the deck during the shelling or a five-day round of seasickness.

Part, perhaps most, of the confusion in handling the rubber problem can be traced to the amount of money involved in the synthetic rubber industry that is America's only solution until the war has been won. In this article, the science editor of Associated Press explains what is at stake.

Real Threat

Japanese Force in Aleutians Clearly Too Large To Regard With Anything but Misgivings.

By DAMON RUNYON

I FEAR the average American, possibly misled by the slightly frivolous attitude on the part of the navy department at the outset, is inclined to underestimate the adventure of the Japanese in the Aleutians.

In my opinion, it definitely represents the opening of an assault on Alaska that can be prevented only by an immediate and very large-scale operation to dislodge the brown devils before they cover the rocky islands of the western Aleutians with a profusion of vermin.

I discount conjectures that this occupation of American soil was intended merely as an endowment to the people of Japan, or as a threat against Russia, or for any other purpose than an invasion of Alaska, from which the Japanese would be able to strike at Pacific coast cities. Invasion in this Jap racket, as they have demonstrated in this war, Invasion of America is a long big dream.

The trouble with too many persons in this country, including some in authority, is that they persist in thinking the Japs are given to gestures of this nature just to make the native folks feel happy, when the truth is there is a deadly serious motive in all their maneuvering. One of the most serious of all against the safety of the United States is the Aleutian expedition.

I THINK our naval and military master minds realize this now, though there was some clucking about it in the beginning. The navy department said of the report of the invasion, seven weeks ago that none of our islands or rocks were troubled with unwelcome visitors, a jolly way of tossing off the most sinister threat against these shores in a hundred years.

Afterward the navy department agreed somewhat affably that the Japs had landed all right; but that the landings were "small." You gathered that no more than enough skibbles to make up a gin-rummy party had assembled on the bleak islands. The department also remarked easily, that it saw no strategic importance in the Japanese incursions.

The navy's master minds continue to make a deep mystery of the Aleutian situation and at the same time seem disposed to give the impression that it remains a minor incident. An executive of a big press bureau, apparently speaking on inside info from Washington, remarked to me the other day that the Aleutian matter had settled down to a "mopping up" and that my fears of danger from that quarter were quite groundless.

THE following day, the navy announced the sinking of three Japanese destroyers and one transport in the Aleutians. It had previously tabbed the sinking of three other destroyers and one transport, and damage to four enemy cruisers, three destroyers, one

RUSH AIR BASE IN AUSTRALIA

Army Aircraft Repair Plant Completed in Record Time.

WHERE IN AUSTRALIA, a huge repair depot and base for the United States Army aircraft, has been completed in record time at an estimated cost of \$9,750,000. The base is located at Ashland, in the state of New South Wales, and is the largest of its kind in the world. It is a masterpiece of engineering and construction, and is the result of the cooperation of the United States Army and the Australian government.

DRAFT CLINIC FOR INDUSTRIES BOOKED

Factory Heads in Area To Hear Draft Officials.

The policy to be followed by draft officials in calling men from war industries into military service will be outlined by officials of the state selective service organization at a meeting in Marion Wednesday, August 5. The meeting, which will start at 7:30 p. m., will be held in the Marion club rooms at Hotel Harding, and will be sponsored by the Marion Chamber of Commerce.

Invitations have been sent to manufacturers in Marion, Mt. Gilead, Delaware, Kenton, Upper Sandusky and Bucyrus, and also to the three Marion county selective service boards. The speakers will include Lt. Col. Furman G. Spencer, chief of the occupational deferment division, Lt. John A. Nolan, classification officer of the manpower division, and Edward S. Nease, chief of the inspection division, all of Columbus.

The speakers will be pointed out will outline the general policy regarding deferments for men engaged in war work. Personnel directors and others handling the status of employees with respect to selective service are expected to attend. A question and answer period will follow the talks.

Installation Is Held by Marion K. of C. Council

WILLIAM H. SIMMONS

Officers for 1942-43, headed by William H. Simmons, of 320 Oak street, grand knight, were installed at a meeting of Marion Council No. 671, Knights of Columbus, Tuesday night. Walter Marnell of Delaware, district deputy, and Thomas E. Andrews, state warden, were the installing officers.

Installed with Mr. Simmons who succeeds Nelson G. Irvin as grand knight, were: Rev. Father William J. Spickerman, chaplain; Joseph M. Dunn, deputy grand knight; Gregory J. Wilhelm, chancellor; Louis O. Columbus, warden; William M. Daugherty, recorder; Michael C. O'Brien, secretary; Robert A. Kelly, advocate; Joseph R. Fabian, inside guard; Robert Cochran, outside guard; Nelson G. Irvin, trustee for three years; and Henry A. Kribaum, trustee for one year. Justin Corneily will serve as lecturer and Floyd Corneily will be the financial secretary for the year. William M. Fabian, the third member of the board of trustees, was named on the board last year and will serve for three years. Kribaum will complete the unexpired term of Joseph Dunn.

This year marks the 40th anniversary of the institution of the council. Mr. O'Brien is a charter member of the organization and has served for some time. Mr. Andrews gave a report on the state K. of C. cutting held over the week-end at Cedar Point. Attending were Mr. and Mrs. Andrews and Mr. and Mrs. Elmer Cornely. A smoker and social hour followed the business session.

Saboteurs' Case in Supreme Court

(Continued from Page 1)

communicating the same to Germany. They were expressly directed to go unarmed and not to kill or injure any individual.

"They came to America on submarines and landed in two groups on the Long Island and the Florida coasts. They brought certain explosives which they buried on the sea shore. At the time of their arrest, they had committed no acts of sabotage, had taken no steps toward sabotage, and had made no definite plans as to time and place of committing any sabotage."

The defense acknowledged that all of the petitioners were citizens of the German Reich except Herbert Haupt, 22, youngest of the defendants, who was brought to this country when five years old and acquired United States citizenship through his parents' naturalization.

Haupt contended, the defense said, that his citizenship, thus acquired, has not been lost in any manner. On the contrary respondent (the prosecution) contends that Haupt has lost his citizenship.

The brief noted that "practically the sole evidence is Haupt's own statement on the stand or in his confession."

Outlines Actions

The brief outlined his actions from the time he left America last year for a trip to Mexico and Nicaragua, going to Japan "when the Japanese ran low in Mexico." He signed on a German ship as a seaman, later transferred to a ship that went to Germany and arriving there was "treated and listed as an American citizen."

Haupt asserted through counsel that he never had renounced his citizenship and that he entered the sabotage school as a means of returning to his parents in Chicago.

It was argued further that the contract signed in connection with the school contained no renunciation of American citizenship and that the work clothes which he wore aboard the submarine were not worn in his capacity as a member of the German army but were a necessary requirement for getting back to America.

Haupt denied that he took any oath of allegiance to Germany or that he had joined the German army or the Nazi party, but that instead he had "at all times intended to return to America."

Upon his return, the defense said on Haupt's behalf, he applied for a job and registered for the draft, and never had any intention to commit a crime against the United States.

The story of the prisoners as told by the prosecution charged that they were recruited by an officer of the German high command for training in a special school for sabotage work and that they were also trained in the use of secret writing, for communication to Germany and among themselves in the United States.

This latter assertion was directed against the defense effort to show that the prisoners were not spies.

In Pay of Nazis

"Upon the conclusion of the training," the prosecution brief said, "the German government contracted to pay them for acting on its behalf, and transported them to the United States by submarines of the German navy. Before boarding the submarines, the petitioners and one George John Dasch (the lone defendant not joining in the petition), were separated into two groups of four each. One group went by submarine headed for Long Island. The other group went upon another submarine headed for Florida."

"On the submarines, all wore fatigue uniforms of the German marine infantry, and were told that, if they were captured in these uniforms while landing they would be treated as prisoners of war. If not captured immediately, they were to change to American-made civilian clothing."

"Both submarines escaped our naval and other patrols and landed the petitioners under the cover of darkness."

BOWLING ALLEYS CONCERN CLOSED

S. Prospect St. Center Involved in Court Actions.

The Marion Recreation Center at 128 South Prospect street, Marion, was closed yesterday by the sheriff's office on executions by the Brunswick, Balke, Celler, Co. of Chicago, equipment manufacturers.

Three cognovit judgment actions totaling more than \$6,000 have been filed in Marion county common pleas court by the company against Arthur A. Wintersteller of 417 Oak street, owner of the center. George T. Geron is attorney for the equipment manufacturers.

The center was opened about six years ago by Mr. Wintersteller and for the last month has been under management of Emerson Schenck.

About a month ago Mr. Wintersteller took a job as yard clerk with the Chesapeake & Ohio railroad, working on the midnight to 9 a. m. shift.

No announcements had been made today whether the alleys will be operated in the future.

ing of the motion. Otherwise the court would be acting under circumstances forbidden by presidential proclamation.

The eight men are accused of landing from submarines at night on beaches of Long Island and Florida, bringing with them sizeable stores of explosives and money. All were picked up before any actual sabotage occurred.

The prisoners, all German-born and all former residents of the United States, are Ernest Peter Burger, George John Dasch, Herbert Haupt, Henry Harm, Heinek, Edward John Keeling, Hermann Otto Neubauer, Richard Quirin and Werner Thiel.

Dasch, who was given special counsel and is reported to have aided the government in presenting its case, is not participating in the motion before the supreme court.

FORMER MARION WOMAN DIES IN CINCINNATI

Mrs. Gladys Bannigan, 31, of Cincinnati, former resident of Marion, died at cancer at 8 p. m. Monday in General hospital, Cincinnati. She was the daughter of Mr. and Mrs. Kenneth Sayre of 197 South High street, Marion, and was born Nov. 19, 1907.

Her marriage was to Thomas Bannigan of Cincinnati who survives with four children, all at home, the parents, a sister, Mrs. Earl Thomas of near Marion and a brother, Earl Sayre of 498 North Greenwood street.

The requiem mass will be solemnized at 9 a. m. Thursday in St. Mary church at Cincinnati, and burial will be made in St. Joseph cemetery.

DELAWARE MAN HURT
IN TRAFFIC MISHAPWhen Car Leaves
Near Marion.

A hospitalized Delaware man was hurt in a traffic mishap this morning by a patrol car.

On a highway near Marion, a patrol car was struck by a car leaving a driveway. The patrol car was driven by a man who was not injured. The car leaving the driveway was driven by a man who was injured and is now in the hospital.

The accident occurred on a highway near Marion. The patrol car was struck by a car leaving a driveway. The patrol car was driven by a man who was not injured. The car leaving the driveway was driven by a man who was injured and is now in the hospital.

Quick Commando Attacks
Prelude To Second Front

War Writer Discusses Terrific Hazards Involved in Invasion of Europe.

BY BILL BOWEN
New York, July 29.—The first phase of the second front in Europe is the commando attacks on the coast of France, which are being carried out by the British and American forces.

The commando attacks are being carried out by the British and American forces. The attacks are being carried out by the British and American forces. The attacks are being carried out by the British and American forces.

Also on Paper
But that is the picture only on paper. In actual fact, it is a problem that means full-time work for the military and naval forces in London and Washington. You need no more than a realist to see the difficulties that confront them.

For two years the Germans have built up their defenses along the western shore of the European continent. Where that shore is closest to England, those defenses are strongest. Where the defenses are weakest, they also are farthest removed from the threat of attack.

NATIONWIDE MEAT
SHORTAGE FORECASTOPA Given Report Showing
Decline in Cattle Feeding.

By The Associated Press
OMAHA, July 29.—That the nation's meat supply will become nationwide scarce is the forecast of the National Livestock Advisory Council, which was presented to the Office of Price Administration in Washington today.

The council, a group of livestock producers and processors, has been formed by the OPA. The council is made up of representatives from the livestock industry and the OPA.

DRAFT BOARD NO. 3
APPEAL AGENT RESIGNS

Alfred Donithen Ends Service Because of Family Illness.

Alfred Donithen, attorney, has announced his resignation as an appeal agent for Draft Board No. 3, the board which covers the rural area outside the city.

Mr. Donithen submitted his resignation to Governor John W. Bricker and it has been accepted. He has served as the appeal agent for the board since July 10, 1942, but was forced to resign because of illness in his home, which requires all of his attention after office hours.

YOUR HEALTH

By LOGAN CLENDENING, M. D.

Heat and Cold

MEDICAL science has been very much interested in the last few years in the reaction of the body to heat and cold. At this season of the year most people are interested in the reaction of the body to heat.

It is a curious and interesting fact that the human body is able to maintain the greatest rise in temperature of any part when the body is heated. This is probably due to the fact that in the fingers and toes the general reaction of the body to heat is capable of the largest amount of variation. By this I mean that the reaction of the body to heat is, first, to dilate all the superficial capillary blood vessels and then to throw out a thin layer of perspiration which, on drying, reduces the temperature and hence cools the blood in the dilated capillaries.

The fingers and toes have the largest amount of capillary expansion and are very sensitive in responding to changes in the nervous reflexes which cause dilatation of the capillaries. Also the fingers and toes do not sweat very much and hence retain the heat due to the dilated capillaries.

While this has all been proved in very solemn, scientific fashion, it seems to me that human beings have instinctively known this for a long time. The instinct to bathe hands and wrists, to go barefoot in hot weather, to wade or treat the feet to cold water from the hydrant, all point to an instinctive knowledge that reduction of the temperature of the fingers and toes will reduce the temperature of the whole body.

Seasonable Variation. Scientists have also shown that there is a reasonable variation in the capacity of the skin to react to heat. It is possible to measure the time between applying an impulse to the automatic nervous system and the time when the capillary blood vessels begin to dilate.

This period, which is called the clearing time, begins to lengthen progressively in the body, reaches a high level in December which is maintained until spring. This has been proved in observations on the same individual year after year. This variation probably explains why we are so much more uncomfortable in the late spring and early summer heat than we are later on in the summer; the body has not had an opportunity to adjust itself so that rapid cooling reactions can occur.

These experiments, of course, apply to those living continuously in a temperate climate. With a wide variation in the year around, I know of no such experiments, but I would like to see some on people who live the year around in a fairly hot climate, and on those who regularly go to warm climates during the winter months.

DRIVER ARRESTED

Frank Gannaway, 38, of Kalamazoo, Mich., was arrested on a charge of reckless operation on Route 23, north of Marion, Monday night by the state highway patrol. He posted \$15 bond for appearance Friday morning in municipal court.

Daily Pattern For Home Use

By ANNE ADAMS

Three cheers for the shirtwaist—first choice of all smart women! This Anne Adams design, Pattern 4123, has the new softer look in its wide-pointed collar and single-button bodice. The waistband and front skirt panel give nice lines.

Pattern 4123 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 32. Size 16 takes 4 yards 35 inch material.

Be smartly patriotic—with our Summer Pattern Book. Here are fabric-saving, distinctive styles for every occasion; every age. And each design is easy enough for beginners. Send 10 cents for your copy!

Send your order to The Marion Star, Pattern Department, 243 West 17th St., New York, N. Y.

Pitfalls of Love

By ADELE GARRISON

AT MARY'S query there swept across me as my nervous, un-reassuring objections to leaving my hotel suite, the fear there might be a telephone call from the farmhouse with some possible message of disaster to the children.

"Perhaps it might be a message," I said slowly, "but you know how things are at the farm with Aunt Katharine away. I like to be near a telephone by which I can reach her after night fall."

"Just Grandma there, also," Nurse Whitlock and Aunt Lillian, to say nothing of Kate and 'dot Jean'."

She so perfectly imitated Kate's deprecating manner when she speaks of her husband that I chuckled.

"Yes, they're all there," I said, "I'm engaged in seeing to it that Faith and Junior and Rodrick don't get lost, strayed or stolen."

"Yes," I assented, "but they're not all exactly what you would call 'assets'."

"No-o!" she admitted. "Grandma probably has to be prevented by force from scalping Katie at least three times a day. Katie is taking her troubles out on her less-suffering Jim, while Aunt Lillian—"

Her voice trailed away into silence, and I knew her thoughts, like mine, were with Lillian, now at the farm in obedience to my father's mandate, and suffering with Spartan heroism a thousand deaths, while still no ray of light pierced the cloud of mystery surrounding the whereabouts of her daughter.

"Aunt Lillian is an asset, always," I said. "And I think my father was wise in his mandate. She loves the children, and with their constant companionship and the care she insists upon giving them, her burden is being eased, though not forgotten."

Ready for Message

"However," I went on, "she is far more nervous about the children than Miss Whitlock, more fearful of some catastrophe befalling them. I know she likes to feel I am where she can reach me by telephone at any minute."

Mary then stressed another point in her argument. "Of course your biggest asset is Miss Whitlock," she said hopefully. "She's almost as capable as Aunt Katharine, even if not quite up to Aunt Lillian. Mary said shrewdly."

Then she changed to the voice with which Dicky once said she could "coax any bird off any variety of bush."

"Don't you think you could possibly make an exception this once?" she asked. "Aunt Katharine would be here in the suite, wouldn't she?"

Mary Proposes a Plan

"Yes, she'd be here."

"Then," Mary said triumphantly, "you could give her the telephone number of that restaurant."

and if she received a summons from the farm, she could relay it to you there. That would solve your problem, wouldn't it?"

"It might," I told her reluctantly. "Then I faced her with sudden realization."

"But you know I can do nothing without my father's permission. He's in the next suite. I'll go in and tell him about this. Or have you already spoken to him about this mysterious old man?"

"Her face registered quick alarm."

"No, I haven't," she said. "But, Auntie Madge, do you suppose that when you tell him I've broken my promise to him and spoken out of turn?"

The Stars Say—

For Thursday, July 30

A highly productive and pleasant state of affairs is forecast from reassuring planetary figures. All sorts of good fortune might be expected from such auguries, both in private and business interests. It is an expansive, broadening, generous and fertile influence, denoting all sorts of benefits, growth, enhanced prestige and popularity, with finances and credit increased, business accelerated, with intellectual and social talents stimulated to high objectives.

Those whose birthday it is may be on the threshold of a year of splendid opportunity, productivity, and high accomplishments, with expansion of interests, personal and business. Finances, credit, prestige and popularity may be enhanced, with important affairs engaging the excellent mental and spiritual qualities. Social festivities, congeniality, celebration of domestic and sentimental events, bring much joy and gratification.

A child born on this day should be splendidly equipped with intellectual, spiritual and material faculties and dexterity for attaining its lofty ambitions.

Gets Jail Sentence In Juvenile Court Case

Robert Dempster, found guilty of contributing to the delinquency of minors when he was brought before Juvenile Judge Oscar East last Wednesday, was sentenced to 30 days in the county jail.

However, since he had served five days in the county jail, the balance of the sentence was suspended on condition that he leave Marion at once. His arrest by Police Captain E. C. Mackan, who filed the charge, following an incident at the fairgrounds involving three young boys. It is understood that his home is in Cincinnati.
